

Smart check-in

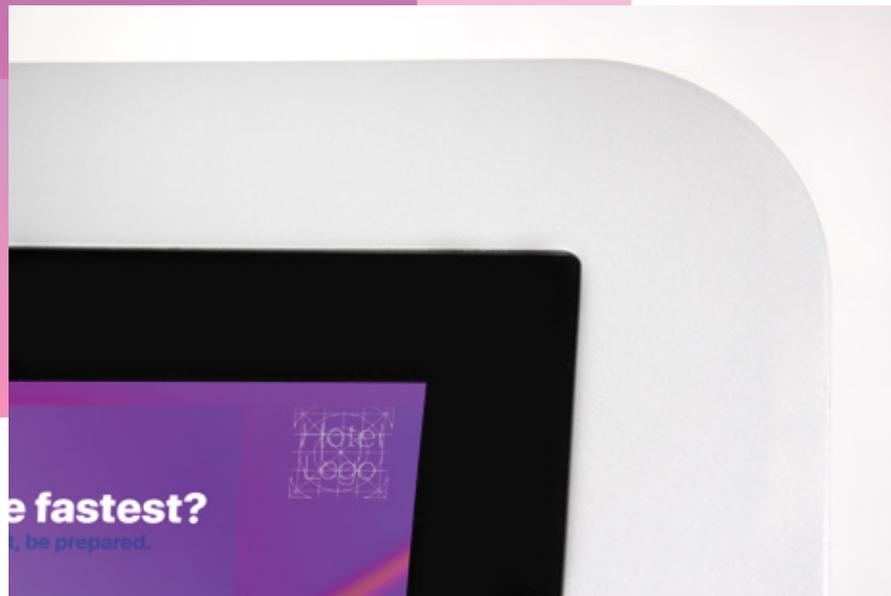

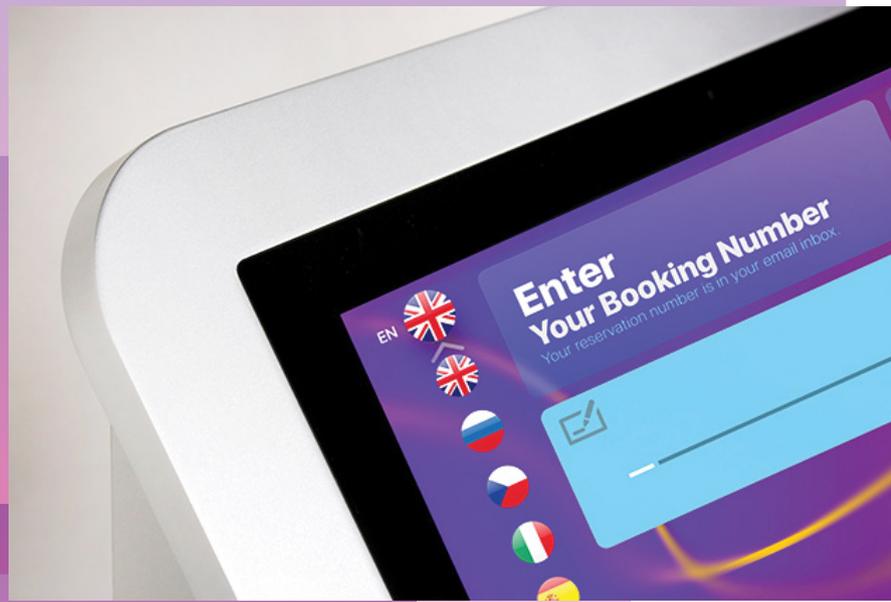

Priority Check-In

The self-check-in solution your
guests will love!

Meet the Check-In Solution of the Future

SOPHISTICATED DESIGN

We've spent years developing Sezam24 to feature the most attractive UI on the market, with an easy-to-use and understand system for all guests of all ages from all around the world.

42 +

42 Languages

Let your guests from all around the world check-in in seconds, with friendly greetings in their native language.

100%

High-Resolution
A striking display with its sensitive touch-screen guarantees rapid response and flawless viewing

1.5 sec

Dispensing and programming room card
When your guest checks in, the system will automatically dispense and program their unique room card. You don't have to do a thing.

1.5 sec

Speed
A high-speed graphical printer provides guests with an instant receipt containing the important information they need to know about.

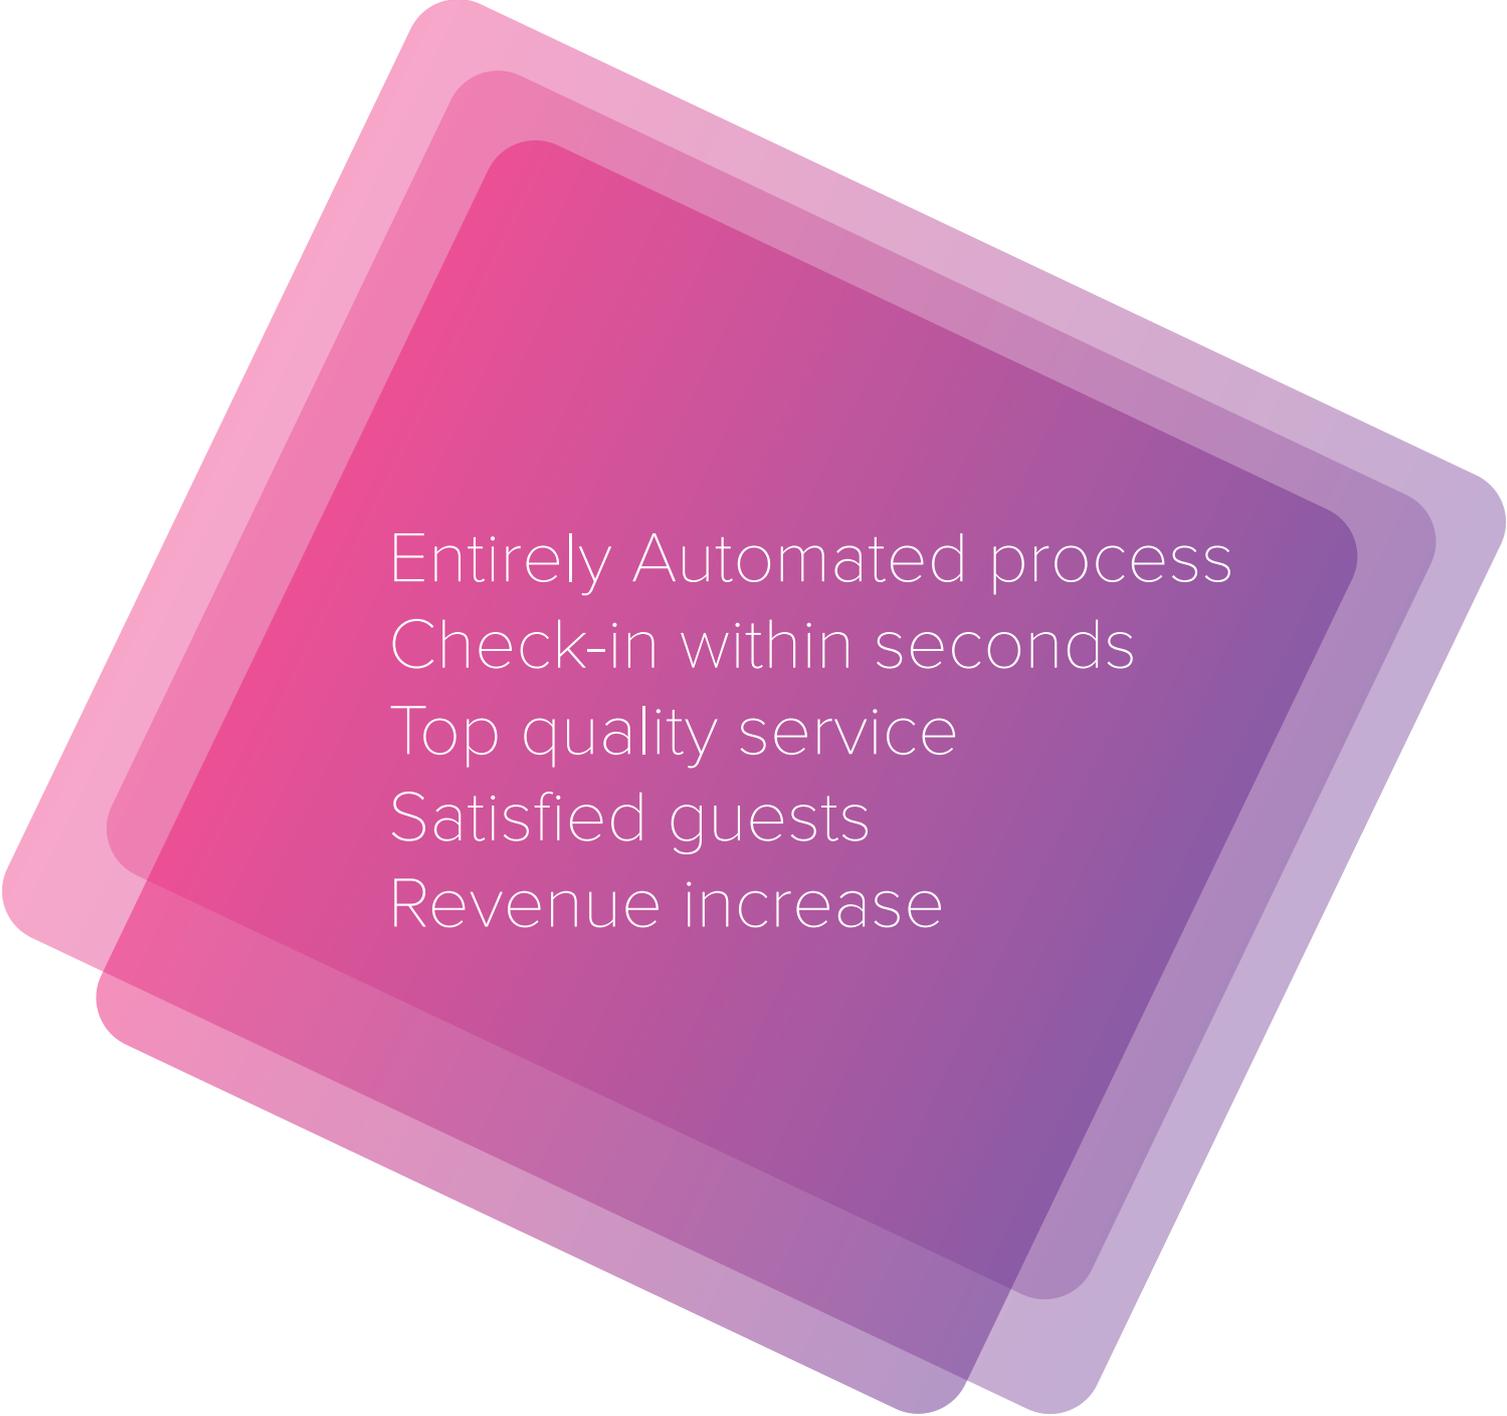

5 sec

Easy Payments
Contactless credit card payments make your guests lives faster and more convenient than ever before

3 sec

Scan
An automatic document scanner lets guests complete registration automatically.

With Sezam24
you have:

Entirely Automated process
Check-in within seconds
Top quality service
Satisfied guests
Revenue increase

42 Languages

Sezam 24 makes welcoming customers pleasant and warm thanks to an intuitive interface. The presence of 42 different languages breaks down any language barrier facilitating the check-in experience and making it less stressful for both customers and staff. Your customers will feel at ease without having to worry about linguistic misunderstandings.

Guest identification

Sezam can trace any booking from OTAs such as booking, Airbnb, Expedia, HRS, and much more. The display will show all the original booking information with an easy-to-understand format to further facilitate the check-in experience.

Cashless Payments

Sezam24 could be supplemented by a POS - terminal for easier and more efficient receiving cashless/credit card payments

Payment is cashless using debit/credit cards, quickly printing out receipts. This system avoids human error and makes payments faster and easier, giving you speed, control, and precise accounting.

* This function is optional.

ID Recognition

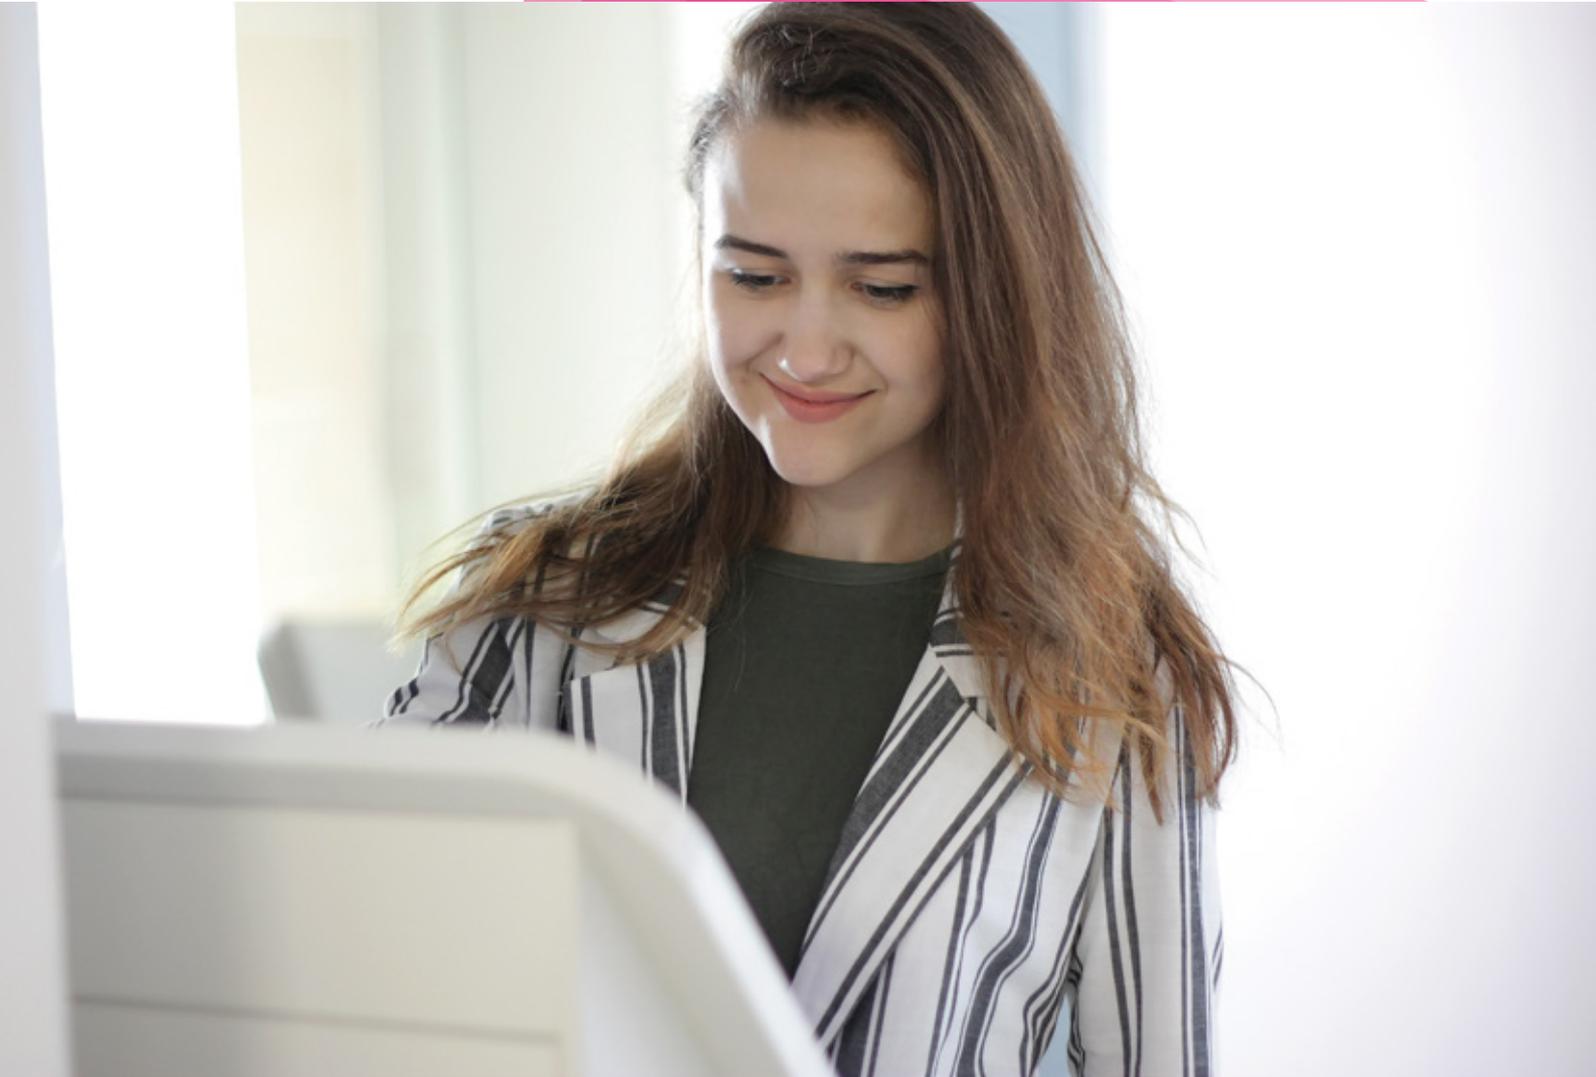

Sezam24 recognizes different types of documents and can use this information to complete the registration form. Recognition takes only a few seconds, further reducing check-in times even when filling in the documents required for the stay. This option is customizable, allowing you to request additional information for registration.

Automated Room Card Dispensing

Guests will receive their uniquely printed room card in seconds at the machine. Check-in times are more flexible as the process is completely automatic and does not require an employee.

Voucher Printing

It is necessary to provide your guests crucial information. Let Sezam 24 print a personalized voucher with any information such as timetables, Wifi password, breakfast, room number, room location, check-out time

* This function is optional.

Emergency Lost Key Retrieval

Guests will receive their uniquely printed room card in seconds at the machine. Check-in times are more flexible as the process is completely automatic and does not require an employee.

Thanks to Sezam 24 it is possible to request the delivery of a new card to lose or replace your guests in another room.

Room reassign

Sezam 24 supports group check-in. Several kiosks can work in groups when there are numerous guests with the same booking number. Key assignment is faster and more efficient, making your customers happier and satisfied with the service.

Group check-in

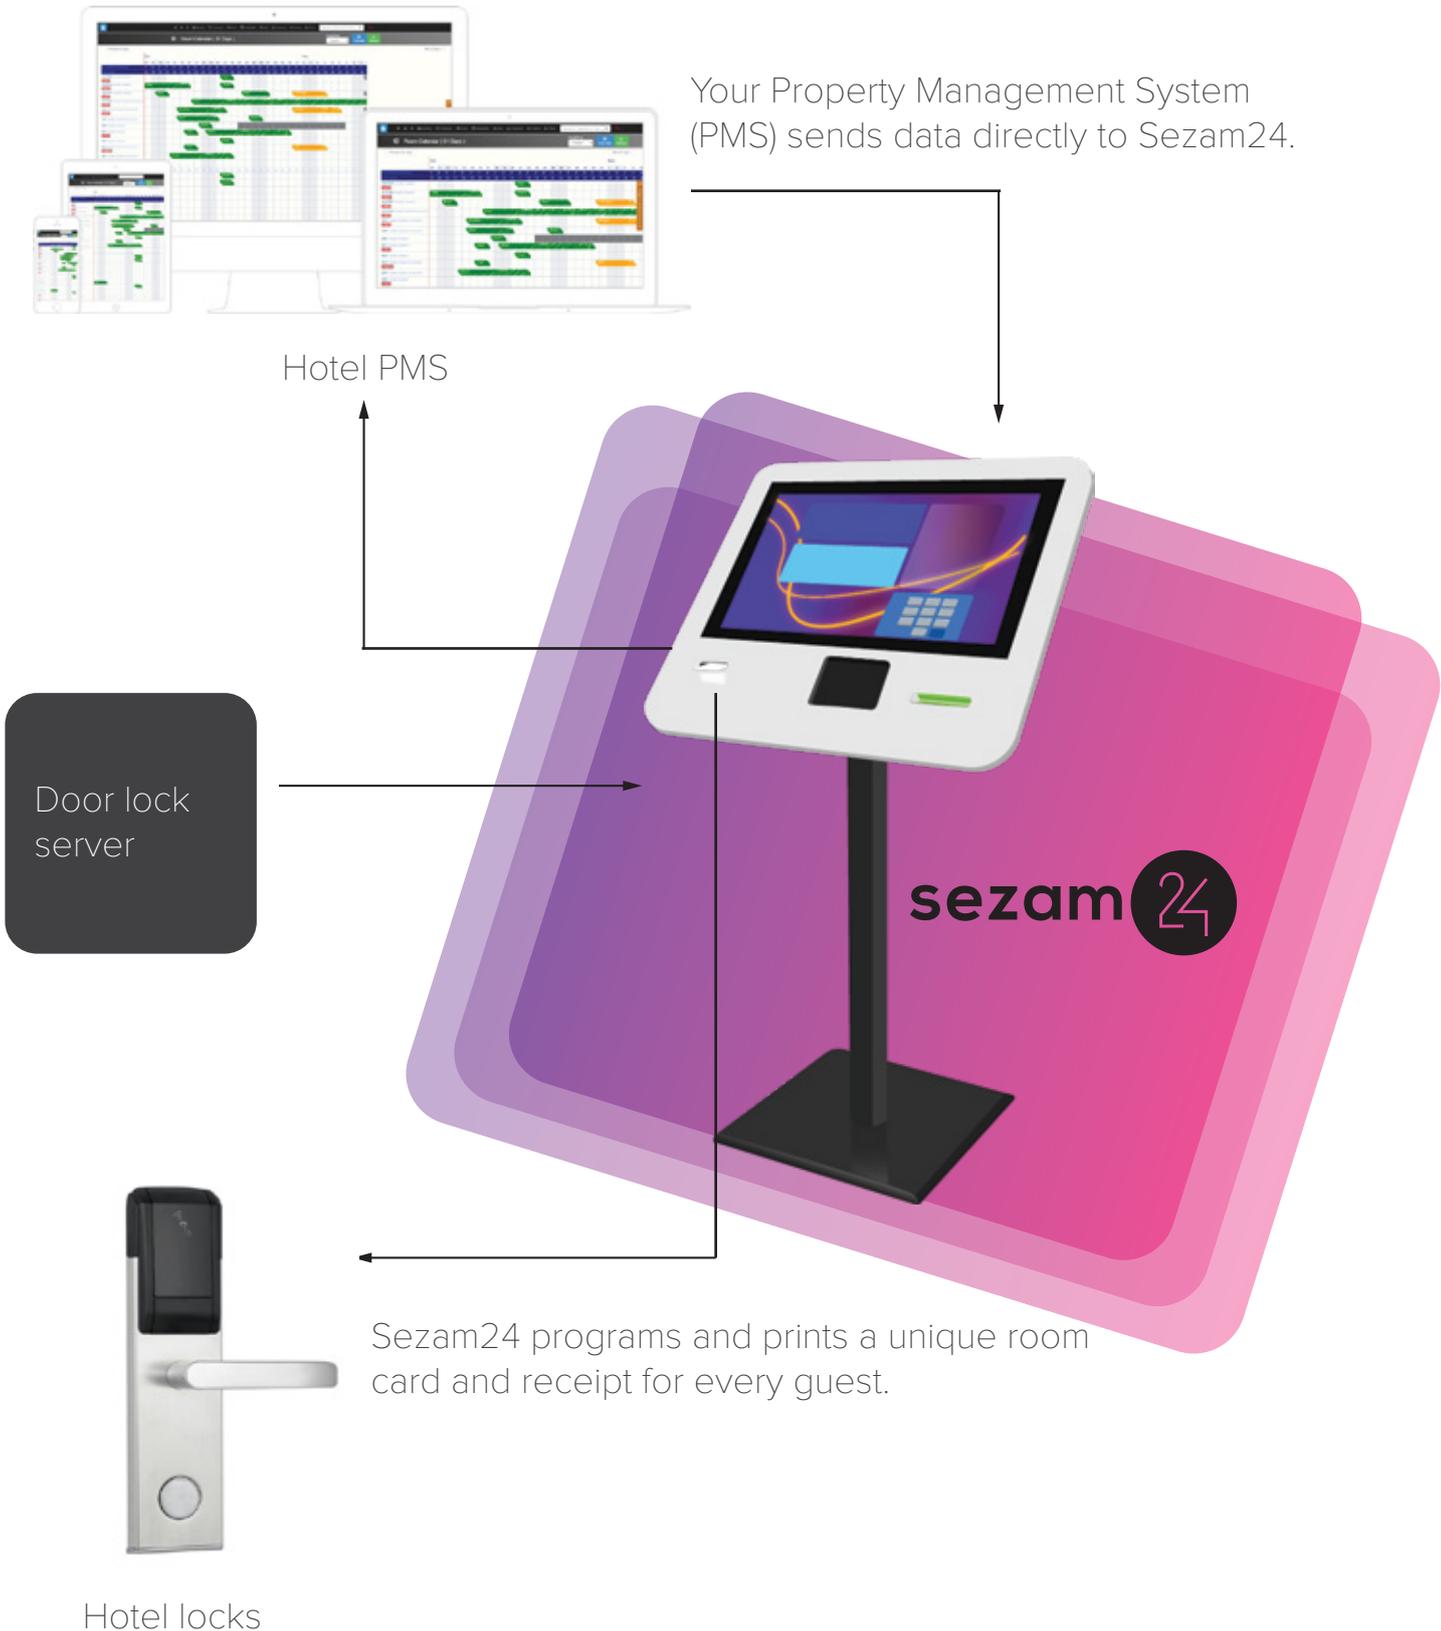

Sezam 24 supports group check-in. Several kiosks can work in groups when there are numerous guests with the same booking number. Key assignment is faster and more efficient, making your customers happier and satisfied with the service.

The check-in experience is extraordinarily simplified and speeded up, saving your guests time but providing them with a warm welcome in your facility, regardless of the nationality of your guests. Check-ins can be carried out at night. Room cards are stored in the device, also providing your customers with a reference point to turn to if they lose their card.

Thanks to our system, the check-in experience is optimized, and your customers are more satisfied. You can increase your hotel revenue up to 20% thanks to our self-service kiosks.

How it Works

Sezam24's seamless interaction process is made possible through advanced engineering and a commitment to simplicity. Here's how things work on the back-end:

How it Works

To use Sezam in your facility, you will need three components: a PMS, a lock system, and Sezam 24.

1. Through the PMS, Sezam receives all the information on your reservations.
2. The displays clearly show the booking data on the display.
3. In a few seconds, after the guided check-in, the data is sent back to the PMS.
4. The reservation data is constantly updated on the status of the reservation and the staff can have everything under control.

we'll get back to you in no time.

The logo for Sezam24 is centered on a large, stylized diamond shape composed of several overlapping, semi-transparent layers in shades of purple and pink. The word "sezam" is written in a bold, black, lowercase sans-serif font. To its right is a black circle containing the number "24" in a white, stylized font.
