

Issue covered in this manual:

- *I am unable to add more rooms when placing a booking via KWHotel Booking Engine. Why?*

Table of contents:

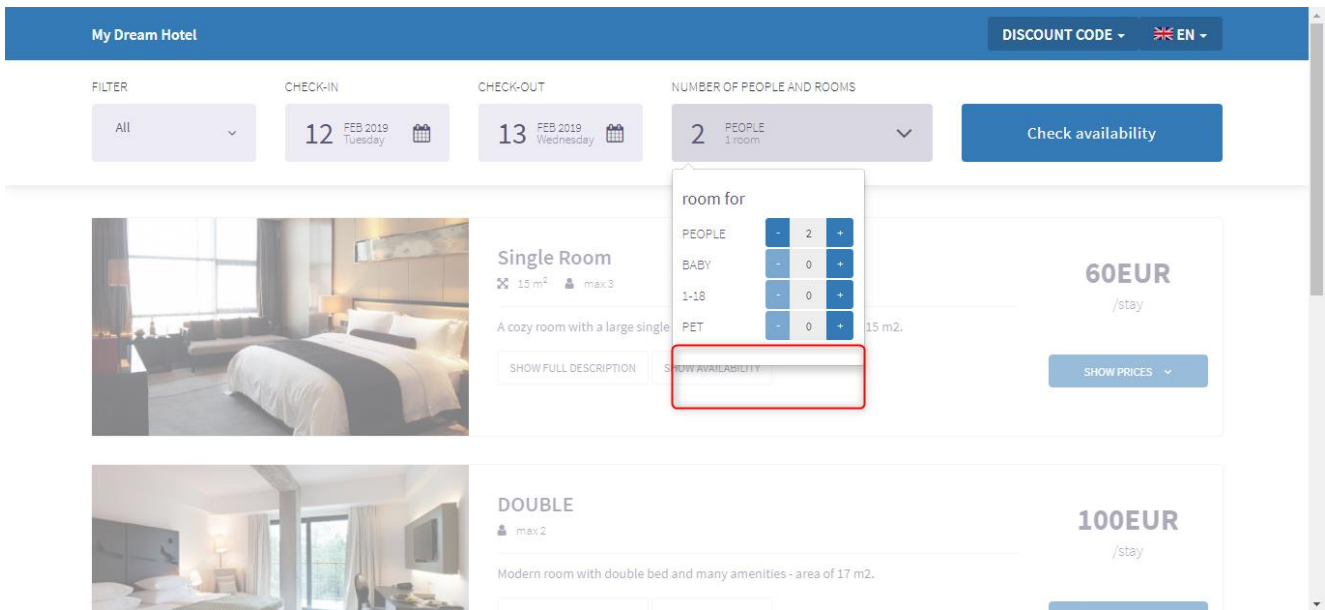

1. Unable to add more rooms to reservation2

1. Unable to add more rooms to reservation

Question:

I am unable to add more rooms when placing a booking via KWHotel Booking Engine. Why?

Solution:

This issue is caused when information about the maximum number of bookable rooms was not set in the web panel at <https://dev.kwhotel.com>. This can be done in the **Configuration > Online reservation > Settings (new)** > insert the desired value in the **"Maximum number of bookable rooms"** field.

Having completed the configuration, adding rooms will be restored in the KWHotel Booking Engine.
